The statistics included in this report represent the activity of the Bureau of Mental Health for the fiscal year ending May 31, 1947. The tables and facts present the statistical picture of the problem of caring for the mentally ill in the Commonwealth of Pennsylvania.

Under the leadership of Honorable James H. Duff, Governor, Pennsylvania is now engaged in the largest program in its history of improving the care of mental patients. Old buildings are being rehabilitated and new buildings which will provide the most modern treatment facilities are being constructed. Intensive training courses are being given personnel and an aggressive recruitment program for all types of employees is under way and is showing results. Special emphasis is being placed on advancing the programs of treatment so that the period of stay in the institution will be shorter and more patients can be returned to their communities.

Studies are continually being made in order to provide the greatest use of existing facilities. These studies have resulted in increased efficiency of the institutions and in a considerable financial saving to citizens of the Commonwealth.

The magnitude of the problem neccesitates long range planning. It is the feeling of the Department of Welfare that when projects contemplated are completed, Pennsylvania's Mental Health Program will rank with the best in the nation.

Department of Welfare
Charlie R. Barber
Secretary

The tablee and statistice appearing in this Thirteenth Annual Report, Section A, are comparable in form to those which have been presented in the previous bulletins of this series. Thie policy ie followed in order that trends can be observed and epecial studiee can be made.

The type of material collected is that recommended by the authoritiee in the field of Mental Health.

Many special studies on this problem have been conducted by the Division of Reeearch and Statistics. Some of theee etudiee were for adminietrative purposes and others were ueed for state-wide planning by the Department of Welfare. Frequently Superintendents of the State Mental Institutions have requeeted statistics in relation to etudies that they are conducting.

The majority of this material is secured from the Mental Institutions. The excellent cooperation of the Superintendents and the members of the institutional staff who prepared these reports makes poesible the completenees of this record.

Compilation of the material preeented in thie report was by the Division of Reeearch and Statistice under the eupervieion of Mrs. Gertrude H. Thompson.

In accordance with previoue practice two additional bulletine of thie seriee are available, Section B, deals with Penal Institutions and Section C, presents Fiecal Tabulations, Children'e Institutione and Agencies and other community probleme, and Institutional Management Report.

* No capacity figures are given for Western State Psychiatric Institute and Clinic because of the type and nature of the institution.

BUREAU OF MENTAL HEALTH

Since 1939, standard tables of statistics relating to patients in the public mental institutions of Pennsylvania have appeared under separate cover as the first section of the Annual Statistical Report of the Department of Welfare. The current issue is the thirteenth of the entire series and represents selected data covering the fiscal year ending May 31, 1947.

The State Mental Institutions of the Commonwealth number 22 in all, and comprise the following: 17 for the mentally ill; 1 Institute for teaching, training, and research; 3 for the mentally defective (non-psychotic and mentally retarded); and 1 for the non-psychotic epileptic. The Ransom Mental Hospital, which was supported by the State but was not State-Owned or operated, was destroyed by fire in May 1947, and therefore, appears for the last time. Its census was transferred to the Clarks Summit State Hospital. This event hastened the conclusion of long pending negotiations whereby the Commonwealth could purchase the remaining County and Poor District properties at Hillside (Clarks Summit) and relinquish all interest and liability at Ransom and at the abandoned mental component of Blakely.

Similar negotiations have been made at Retreat and Embreeville and are still in progress at Hollidaysburg, Somerset, Mayview and Woodville. As completed the stage will be successively cleared for the much needed expansion of all these previously acquired mental institutions and provide relief for our old-line State Mental Hospitals which are so close to their maximum possible development.

This year finds a new administration in office and a legislature in session. Public interest in mental health has matured. Publicity has been stimulated although a degree of sensationalism has given the usual false impressions by generalizing on certain deficiencies and by overlooking

effective services rendered despite tremendous handicaps. It is a tribute to aggressive leadership acting with perspective in judgement that the Governor and the current legislature is giving the Department of Welfare the mandate and the means to proceed with a huge mental construction program involving some $80,000,000 for the new biennium. Moreover, the Department will be able to act upon pre-conceived planning and immediate critical needs without the delaying features of untimely and drastic changes in the philosophy of administration such as are advanced at this time by importuners.

This year's statistics continue to cover a period of institutional restrictions prior to the launching of a full-scale construction program. However, repletion of personnel and expansion of treatment has begun in spite of the same overcrowding and the whole picture points to accelerated progress in the next few years. Accordingly, the total census shows little change but the breakdown reveals an increase in admissions balanced by an increase in discharges.

Of continued interest and concern is the large proportion of the old age group now being admitted to our mental institutions. In fact, 31% of first admissions are now over 60 years of age compared to 21% in 1939. Similarly indicative; 24.6% of first admissions are diagnosed as psychotic seniles and cerebral arteriosclerotics compared to 16.5% in 1939. Population trends make it plain that this feature will be permanent and this situation introduces a geriatrics unit as a necessary component in every well rounded mental institution.

The proportion of paretics, schizophrenics, and non-psychotic elements are practically static among first admissions in proportions of 8%, 25%, and 9% respectively.

Progress must then be made in early and intensive treatment so that

the hospitalization period may be reduced to a minimum. For those who have a chance to avoid continued care, psychiatric wards in general hospitals integrated with out-patient departments and active treatment centers in all mental institutions must become generally available. For those who become well adjusted to continued care and who require a minimum of supervision, placement on a local level by means of boarding-out provisions must be made. In line with this last procedure the Department of Welfare has established relations with 25 County Infirmaries for a considerable number of suitable mental patients furloughed for custodial care.

Of considerable interest will be the completion of statistics at several of our State Mental Hospitals who are tabulating the outcome of 1,000 consecutive unselected admissions. Such studies of individual cases will give an accurate interpretation in the light of current therapy. A preliminary report from 2 of our State Mental Hospitals indicates that about 55% of first admissions returned home within a year's time and that, if the old age group is excluded, 70% of first admissions leave in less than a year's hospitalization.

Hilding Bengs, M.D.
Director
Bureau of Mental Health

WESTERN STATE PSYCHIATRIC INSTITUTE AND CLINIC
Year Ended May 31, 1947

The Western State Psychiatric Hospital was opened in 1942. It is located at Pittsburgh. By an Act of the General Assembly of 1945, the name was changed to Western State Psychiatric Institute and Clinic.

The Institute has a unique function in the program of Mental Health in the Commonwealth of Pennsylvania. Its emphasis is on discovering better methods of treating persons who are mentally ill. In addition, research and study are directed toward the prevention of mental illness. The program of this Institute is planned in cooperation with related institutions and professional groups.

Since this is the only State-Owned Institute for research and training in the field of mental health, its functions are different from those of other mental institutions. Therefore, no comparisons can be made such as population, percentage of occupancy, patient ratio or per capita costs.

The objectives of the Institute are:
(1) Research - the vigorous and intensive study of methods or treatment using selected cases drawn from the whole Commonwealth.

(2) Education - the training of medical students, post graduates, physicians on the staffs of the State Institutions and other personnel such as nurses and social workers.

(3) Observation - an examination of selected cases, offering difficult and unusual problems which may have educational value and require extensive research.

(4) An extensive Out-Patient Department through which a considerable amount of local institutionalization may be avoided. This Clinic also acts as a model and is used for the purpose of improving out-patient clinics in other parts of the State.

COMMONWEALTH OF PENNSYLVANIA

THIRTEENTH ANNUAL STATISTICAL REPORT

of the

Department of Welfare

CHARLES R. BARBER
Secretary

1947

Bulletin No. 91 Penal Section B

-10

Facts concerning the State and County Penal and Correctional Institutions of the Commonwealth of Pennsylvania are presented in this Section of the Annual Statistical Report. Tables will be found which will give information concerning the individuals who are confined and also costs of operating the different institutions.

It must be remembered that the tabulations in this Report are for the period from June 1, 1946 to May 31, 1947. When these tables are compared with those appearing in previous editions of the Annual Statistical Report, it will be noted that there is a gradual increase in the adult population of the Penal and Correctional Institutions of the State.

It is encouraging to note that many counties are reviewing thoroughly the problem of housing the prisoners in the county jails and at least one county is Contemplating the building of a new structure because of the unsafe conditions of the old institution.

Continued emphasis in the State Penal Institutions is being placed upon rehabilitation as well as custody. Improvements have been made in personnel and plans are being formulated for additional construction.

Department of Welfare
Charlies R. Barber
Secretary

Annually the Department of Welfare issues three bulletins. Section A, deals with the problems of Mental Health. Section B, presents facts concerning the Penal and Correctional Institutions of the State and Section C, includes facts concerning programs for the visually handicapped and blind, Child Care, Care of the Aged, and other activities of the Bureau of Community Work. This bulletin is Section B, of the Thirteenth Annual Statistical Report. Sections A, and C, can be secured by corresponding directly with the Department.

Prison administrators and public officials in the State should find these series of bulletins helpful if they are faced with the problem of constructing or adding to the County Prisons or Jails. A definite effort has been made to retain a uniformity of tables so that population trends and other factors can be observed.

The work of collecting and compiling the statistics and tables included in this bulletin was performed by the Division of Research and Statistics under the supervision of Mrs. Gertrude H. Thompson.

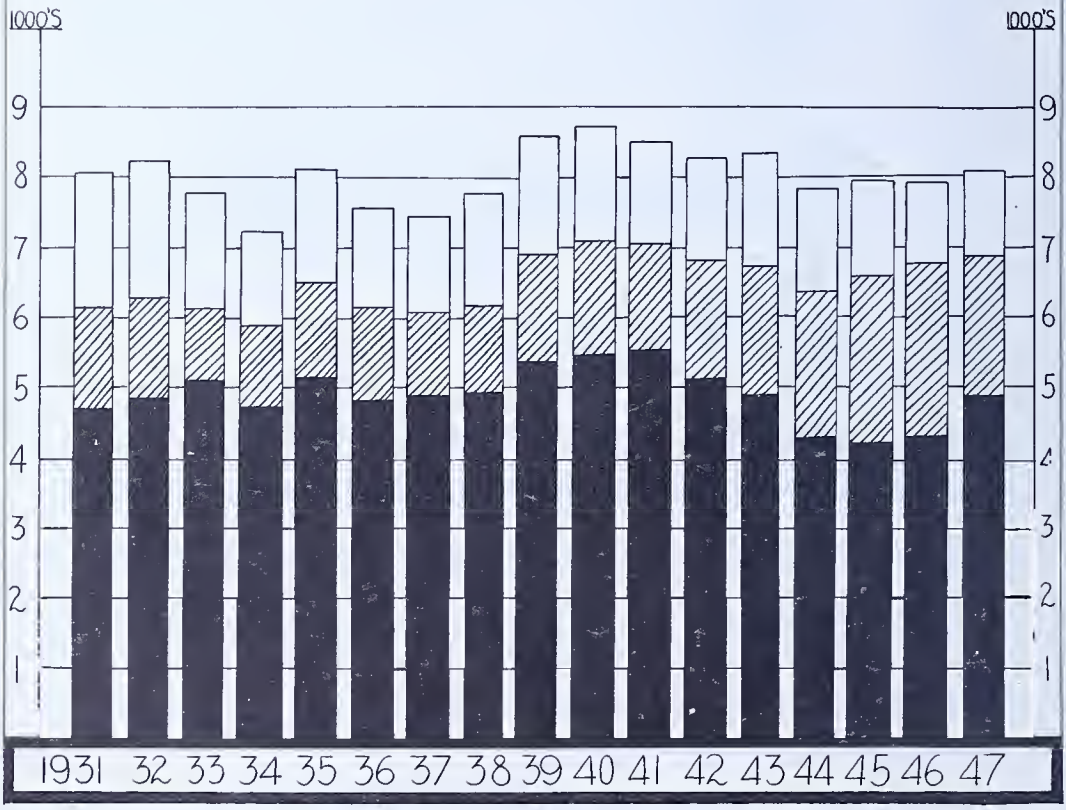
STATE INSTITUTIONS
PENAL
AND
CORRECTIONAL
POPULATION MAY 31
1931 —— 1947



BUREAU OF CORRECTIONS

The Bureau of Corrections of the State Welfare Department is delegated under the Administrative Code and is responsible for the supervision and regulation of all penal and correctional institutions of the Commonwealth.

Definite standards have been presented by the Department of Welfare and approved by the Welfare Commission relative to the physical maintenance and administrative policies now in vogue in the penal and correctional institutions of the State. It is the duty of the Bureau and its field inspection force to examine thoroughly all institutions under our jurisdiction with special emphasis on security, safety, health and maintenance. Any violations or lack of interest on the part of those engaged in the administrative work of institutions under our jurisdiction are promptly reported and recommendations for correction are courteously presented. It is apparent that every lock-up, jail, or penal institutions have local and community problems which enter into some of the difficulties our inspections have revealed but we do keep in mind the urgent need for mutual cooperation and interest that will eventually be helpful in mitigating if not solving the problem completely.

Within our State-owned institutions a classification board passes on the type of confinement, training (both educational and vocational) necessary for each inmate. It is obvious that complete and thorough psychological and psychiatric examinations are essential and made a part of the study and environment of the inmate.

The crime and delinquency problems of this State have been steadily increasing and its prevention and solution are worthy of more careful study and vigilance. It is indeed unfortunate if we view the criminal and those in conflict with the law as just merely custodial inmates of our penal and

correctional institutions. It is wise and indeed proper to create in our minds the concept that notwithstanding his inprisonment and the nature of his crime, the inmate is still worthy of rehabilitation and to take his place in society as one worthy of another opportunity in the ranks of his fellow citizens.

It is evident that with increased facilities and personnel, a much better approach can be made in overcoming many of the defects which our inspections have revealed. We have made some progress, we have in most instances received hearty and cooperative interest from the officials of borough, city, county and institutional managements, but it is still a problem worthy of study, expansion and practical solution if the necessary appropriations are made available.

Department of Welfare
Bureau of Corrections
Fred W. Brady

COMMONWEALTH OF PENNSYLVANIA

THIRTEENTH ANNUAL STATISTICAL REPORT

of the

Department of Welfare

CHARLIE R. BARBER

Secretary

1947

Bulletin No. 91 **General** **Section C**

-10

Statistics, if carefully compiled and properly used, perform an invaluable service.

The Department of Welfare in its use of funds appropriated by the General Assembly for the administration of 40 State-owned institutions must have accurate statistical information at all times.

Proper evaluation of all of the Departmental and Institutional services, relative to budget allotments, operation costs, personnel employment and turnovers, etc., is readily attained and more accurately administered, when guided by accurate statistics.

The statistics found in this Bulletin pertain to activities of the Bureau of Community Work, the Bureau of Institutional Management, and the State Council for the Blind and present a factual picture of the statistics for the fiscal year of June 1, 1946 to May 31, 1947.

Using the tables herein as a guide, the Department of Welfare can more intelligently plan its operations and present the Departmental and Institutional needs to the General Assembly.

It is our hope that the test of time will profitably reflect the amount of work and planning that has taken place during this period.

We feel that this Bulletin will prove a help to institutions and agencies as well as to the various Bureaus in the Department of Welfare.

Department of Welfare

Charlie R. Barber

Secretary

The Thirteenth Annual Statistical Report is issued in three Sections. The first Section deals with Mental Institutions, the second Section with Penal and Correctional Institutions. In this Bulletin will be found tables of statistics which depict the activities of the Bureau of Institutional Management and the Bureau of Community Work. The Bureau of Institutional Management serves all State-owned Institutions supervised by the Department of Welfare and also acts in an advisory capacity to State-aided and tax supported institutions. Consequently, its function is interrelated with all Bureaus of the Department of Welfare.

The Bureau of Community Work is concerned with problems involving the care of both children and adults. This activity covers both agencies and institutions as well as general hospitals and licensed nursing and convalescent homes.

In this Bulletin will be found tables concerning laundry activities, food consumption, unit price of food, farm production and utilities. Statistics concerning the different types of services furnished by the ten State-owned Medical and Surgical Hospitals are also included.

Information dealing with commitments of juveniles to institutions and the numbers of children receiving care away from their own homes appears in separate tables.

In addition,facts supplied by the Council for the Blind, which is an administrative board in the Department of Welfare, appear in this Bulletin.

The work of compiling this report was performed by the Division of Research and Statistics under the supervision of Mrs. Gertrude H. Thompson. The organization and presentation of the material resulted from conferences and advice from the two Bureaus.

WHERE THE WELFARE DOLLARS GO

BUREAU OF INSTITUTIONAL MANAGEMENT

The Bureau of Institutional Management is responsible to the Commonwealth and forty State-owned Institutions for developing and supervising a program providing food, laundry, steam, light, water, sewage disposal, farm products and general maintenance. Standards for goals of performance are promoted. Key employees are called together for conferences on important problems. Monthly summaries of data reflecting efficiency of the food, laundry, hospital, farm and engineering service records are issued to institutions.

Dietary

The use of the Basic Ration as a yardstick of an adequate low cost diet has been continued. The table showing the ration and the average daily consumption per person per day in sixteen of the mental hospitals and schools for mental defectives shows the variation in the ability of institutions in meeting these minimum requirements. An average increase in food consumption during 1946-47 however, is noted. Slight increases appear in meat, milk, cheese, potatoes, and other vegetables and fruit, the decreases have occurred in butter, flour and tomatoes. The butter decrease is due to its price and tomatoes to a poor crop. Food costs increased more rapidly in 1946-47 than in any previous period. The O.P.A. controlled prices of commodities until August 1946. The price of beef increased about 60%, butter about 30%, flour 60%, eggs 20%, sugar 37%, dried beans 70%, prunes 27% and coffee 29%. The unit prices of these foods for November 1947 are included to show the increase which took place in the six months following this period.

The increase in price plus the availability of foods, resulting in a slight increase in consumption, accounts for a daily increase in food costs of about 6¢ per person.

The production of food such as milk, pork, some beef and vegetables has helped considerably to feed as adequately as possible on the limited budget available. Institutions with canning facilities have continued their food preservation program. It too has helped to distribute produced foods to a yearly consumption basis rather than a seasonal basis. About 576,220 #10 cans plus 45,143 pounds of fruits and vegetables were canned and frozen respectively. This figure includes the amounts processed at the penal and correctional institutions except, that which is processed by the Prison Industries for sale to other tax supported institutions.

Personnel shortages continued, however, improvement was noted in some localities. Those institutions which were able to institute a straight 8 hour day were in somewhat better position than those which were unable to do so.

Studies of plans of a new construction at various institutions were continued. The new Dietary Building N-5, at the Philadelphia State Hospital was completed but not occupied during that period.

Farms

At 27 Mental and Penal Institutions, land totaling approximately 35,000 acres is controlled. This land, approximately 15,000 acres of which is cultivated, enables a degree of isolation desirable alike to community and institution. Utilization of land permits wholesome occupation in barns, fields and gardens for a considerable number of patients or inmates. Definite plans are developed for the use of all land in order that the maximum contribution may be made to the over all institutional program. Such plans are developed annually in conferences of institutional administrators with representatives of the Department of Welfare. Food production has long been an important factor in institutional economy. Indeed, during recent years of

scarcity and high prices, institutions would frequently have lacked essential foods were it not for their own production. In planning land use, priority is given to vegetables, potatoes and orchards.

Dairy, cattle, swine and poultry are maintained at institutions having facilities for handling them. These livestock enterprises contribute part or all the milk, pork and eggs used by the respective institutions. Beef cattle are fattened for institutional use at such institutions as have surplus pasture or roughage above dairy requirements. This latter enterprise has of necessity been expanded during war and immediate post war years in order to assure needed meat for dietary use.

Efficiency in production is sought through close attention to modern management practices, through use of improved crop strains and better bred livestock.

All farm planning is correlated with institutional food need and optimum patient or inmate occupation.

Field crops to support livestock use the remainder of tillable acreage. Land suitable for cultivation is utilized as permanent pasture or forest. All land management is planned not only for maximum production but for conservation and development of soil resources.

Laundry

Table IV , yearly summary of institutional laundry data gives average population, pounds of soiled goods, employees--paid and others, working cost and gross cost per pound of soiled goods. The population if institutions receiving laundry service, 58,696, is the highest on record. This figure reflects gradual increase in institutional population.

The total pounds of soiled goods, 48,677,617, is also the highest on record and reflects the gradual increase in population.

Washing costs are only slightly higher than in the past. Gross costs, however, .0106 per pound reflect increased salaries and other high costs.

Patients and/or inmates employed in institutional laundries, 1,564, is the highest figure recorded. Institutions must continue to depend on inmate or patient help to a large extent. The work opportunity provided is, however, considered of distinct value by institutional administrators.

Laundry Test Bundle Analysis

In the table showing Laundry Test Bundle Analysis, a comparison of quality of performance is made between the first five test bundles run during 1935-36 and the 37th test bundle, run in 1946. Marked over-all improvement in quality is evident. Whiteness retention averaged 6% higher in the last test bundle and for 23 institutions was rated at 100%. In the first test bundles, no institution had such a rating. Soil removal averaged 27% in the last test bundle, which is more than a half better than the average of the first five bundles.

These test bundle analyses were made at the Ellen H. Richards Institute of the Pennsylvania State College. They constitute a part of the laundry supervisory service arranged through that egency and which services are made available to all State-owned institutions.

Engineering

The engineering activities cover the various utilities used in conjunction with the operation of the institutions and the maintenance problems that effect the continuity of each of the utilities together with the care of physical property. The table indicating Quantities Used and Costs of Furnishing Operating Services covers volume of items and corresponding costs for basic maintenance materials and utilities. Coal constitutes the largest

single item. Coal cost for the year ending May 31, 1947 was approximately 17% above that for 1946. Part of this increase, however, is accounted for by the addition of Retreat and a full year for Clarks Summit, as compared with 6 months for the latter in 1946. A substantial portion, however, of the added cost is due to higher coal prices.

The increased tonnage in coal is paralleled by increased consumption of electricity, fuel oil and water. The overall expenditures are about 22% above those of a year ago. Salaries and wages are approximately 30% higher, a small portion of which is accounted for by the addition of Retreat and the 6 months period for Clarks Summit.

Hospital Service

Analyses of Hospital Service at State-owned Medical and Surgical hospitals are shown in the following tables:

Patients, Type of Service and Number
Laboratory Analysis and X-Ray Examinations, Type and Number
Clinics, Type and Attendance

The average population of the 10 Medical and Surgical Hospitals was 1,253, a slight increase over the previous year.

The table relating to Patients, Types of Service and Number, reveals that there were 43,503 patients admitted, an increase of more than 7,000 over the previous year.

The table on Laboratory Analysis and X-Ray Examination shows a total of 430,604 laboratory examinations, or 9.9 tests for patient admitted. This number represents over 79,000 more examinations than a year ago. The report of Cystoscopic examinations and Electrocardiograms indicates an increase of 345 and 281 respectively over last year. In like manner, the number of blood transfusions and the administration of blood plasma shows an increase of 565 and 718 respectively.

A total of 44,406 clinic visits this year indicates a slight decrease.

Nursing Education

In the table under Nursing Education in State-owned Hospitals, it will be noted that a total of 126 students, an increase of 23, completed the 3 year course in nursing in the 4 hospitals conducting schools. The school of nursing at the Danville State Hospital was discontinued a year ago.

The number of students receiving affiliation in psychiatric nursing in our State Mental Hospitals has increased 186 over the previous year. The Mayview State Hospital established an approved affiliate program June 1, 1946 and at the end of the year 6 nursing schools were represented in their affiliate group of students.

It will be noted in the table that the Senior Cadet Program is continued in 5 State Mental Hospitals, though the number of Senior Cadets is gradually decreasing. This program has been valuable, both educationally and in the rendition of service.

The Harrisburg State Hospital has maintained its course for licensed attendants, though the number of students actually completing the course is small.

Bureau of Institutional Management

BUREAU OF COMMUNITY WORK

The activities of the Bureau of Community Work are correctly indicated by the title of the Bureau. Practically all welfare activities found in a community are either directly or indirectly related to the responsibility of this Bureau.

Certain areas of service are defined by statute. The majority of these laws are in the Administrative Code. There are many other acts dealing with specific phases of welfare work which place additional responsibilities upon this Bureau.

The impact of the war created many problems which affected the lives of the children of the Commonwealth. The increase in juvenile delinquency during the war period aroused in many communities an interest in improving programs for children. The program of war production which encouraged mothers to enter factory work complicated further the community's responsibility for the care of children.

In order to further protect children who receive care away from their own homes, the 1947 Legislature passed an Act which requires commercial boarding houses providing full time care for children between the ages of three and sixteen to secure licenses. The purpose of this law was to prevent people from exploiting children by caring for a large number and not providing satisfactory accomodations, food, or program of supervision.

Many counties have become sincerely interested in providing adequate detention quarters for children who are being held on delinquency charges. The Bureau of Community Work represents the Department of Welfare in approving these facilities. In all the requests for this type of service it has been the aim of the Bureau to recommend facilities that would meet the needs of the

individual county both in terms of an adequate program for the children as well as the financial resources of the county.

A program of in-service-training for members of institutional staffs was inaugurated during this period. This included all institutions in the State which have the responsibility of caring for children. The course was constructed with the help of a committee of superintendents and the subject matter deals entirely with the problems of how to care for the individual child. Subjects involving administrative procedures are carefully avoided. These courses are given in the institution by a member of the staff of the Bureau upon the request of the superintendent. This represents another step in the program of rendering service to the agencies and institutions of the Commonwealth.

In the Division of Homes and Hospitals a definite increase in the number of nursing and convalescent homes was observed. The increasing number of elderly people and need for care for the chronically ill were the major causes affecting this increase. In addition, the housing situation reflected itself in the number of changes of address which were made by licensed nursing or convalescent homes. Each move required almost the same type of investigation as that which is conducted for a new license.

The 1947 Legislature also passed a Bill which required the Commonwealth of Pennsylvania to participate in the Federal Hospital Construction Program under Public Law 725. This program places upon the Department of Welfare the responsibility of administering Federal Funds which are available for participation in hospital construction.

One of the requirements of the Federal Law is the guaranty that the hospitals are maintaining adequate standards of maintenance and operation.

This requirement places upon the Division of Homes and Hospitals an additional responsibility in supervising non State-aided Hospitals that receive federal funds.

Increasing interests of the public in adequate hospital care is also reflected in the number of new hospitals that have been incorporated during the past year. All charitable, non-profit organizations must have the approval of the Department of Welfare before they can be granted a charter.

In order to further protect the public from illegal solicitation, the last session of the Legislature passed an ammendment to the Solicitation Act which requires paid solicitors to register with the Department. Through an educational program conducted by the Bureau there are more agencies in Pennsylvania registered under the Solicitation Act than in any previous time in the history of the Commonwealth.

In all fields of activity of the Bureau the goal has been to encourage and help to establish good standards of care for the citizens of the Commonwealth who need the services rendered by the different institutions and agencies. Many examples could be given where noticeable progress has been made. This progress reflects the excellent cooperation of the public and private citizens identified with the program as well as the sincere efforts of the staff members of the Bureau.

There is close cooperation between the Bureau of Community Work and the other Bureaus in the Department of Welfare. The structure of the Department of Welfare facilitates a close working relationship.

There is need for a great deal of study in methods of improving services to the children and aged people of the Commonwealth. This study should

not only include the types of service that should be rendered but also the method of supporting these services. Never in the history of our country has the problems of children and the aged been so acute. No one group or agency is able to project these solutions. It must result from a cooperative action and concern of the citizens of the Commonwealth.
